Advisory Action Before the Filing of an Appeal Brief

Application No.	Applicant(s)
10/840,165	DREEZEN ET AL.
Examiner	Art Unit
Eric W. Thomas	2831

	_
The MAILING DATE of this communication appears on the cover sheet with the correspondence address	
THE REPLY FILED 19 July 2005 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.	
1. The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonme this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.3 a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following periods:	ch 1; or (3)
a) The period for reply expires 3 months from the mailing date of the final rejection.	
b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITH	
TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).	I FILIN
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extens have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extens under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if time may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL	nsion fee ; or (2) as
2. The Notice of Appeal was filed on A brief in compliance with 37 CFR 41.37 must be filed within two months of the filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appear a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a). AMENDMENTS	
3. The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because	
(a) They raise new issues that would require further consideration and/or search (see NOTE below);	
(b) ☐ They raise the issue of new matter (see NOTE below);	
(c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issue rappeal; and/or	es for
(d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims. NOTE: (See 37 CFR 1.116 and 41.33(a)).	
4. The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-3	324).
5. Applicant's reply has overcome the following rejection(s):	
6. Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment cancer non-allowable claim(s).	eling the
 7. For purposes of appeal, the proposed amendment(s): a) will not be entered, or b) will be entered and an explanation how the new or amended claims would be rejected is provided below or appended. The status of the claim(s) is (or will be) as follows: Claim(s) allowed: Claim(s) objected to: Claim(s) rejected: 1,2 and 4-21. Claim(s) withdrawn from consideration: 22-29. 	ion of
AFFIDAVIT OR OTHER EVIDENCE	
8. The affidavit or other evidence filed after a final action, but before or on the date of filing a Notice of Appeal will <u>not</u> be ent because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necess was not earlier presented. See 37 CFR 1.116(e).	ered sary and
9. The affidavit or other evidence filed after the date of filing a Notice of Appeal, but prior to the date of filing a brief, will <u>not</u> be entered because the affidavit or other evidence failed to overcome <u>all</u> rejections under appeal and/or appellant fails to pro showing a good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).	
10. The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached. REQUEST FOR RECONSIDERATION/OTHER	
11. The request for reconsideration has been considered but does NOT place the application in condition for allowance because Continuation Sheet.	ause:
12. Note the attached Information Disclosure Statement(s). (PTO/SB/08 or PTO-1449) Paper No(s). Other:

Application No. 10/840,165

Continuation of 11. does NOT place the application in condition for allowance because: Regarding claim 1, Nishizawa et al. disclose in the abstract a termination coating directly coating a surface mount ceramic capacitor comprising a thermosetting resin and conductive filler, the termination coating is in direct contact with the electrode. Nishizawa discloses the claimed invention except for the metallic filler is selected from the group consisting of copper flake, copper powder, silver plated copper, cobalt, indium, or mixtures thereof. Nishizawa disclose that the filler is not limited to any particular powder (as noted by applicant). It should also be noted that Nishizawa et al. disclose the powder used in the terminal electrode can be any known metal filler used in the ceramic capacitor art (see page 2 paragraph 3). Nishizawa discloses the filler can be a precious metal powder such as silver or palladium or a metal powder of nickel or the like (base metal). Prakash et al. teach in col. 1 lines 30-50, that it is common in the multilayer ceramic capacitor art to use copper powder in the external electrodes that directly connects to the capacitor. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to use a copper powder (the well-known material) in the terminations of Nishizawa, since copper is a well-known base metal having high electrical conductivity which is relatively less expensive than precious metals (silver, palladium) and copper exhibits higher electrical conductivity than nickel (nickel has a higher electrical resistance). Nishizawa et al. disclose the termination coating is cured at a temperature less than about 300°C".
